

Publication - National Ocean Service - U.S. Coast Pilot 3, covers the Atlantic coast from Sandy Hook to Cape Henry, including the New Jersey Coast, Delaware Bay, Philadelphia, the Delaware - Maryland - Virginia coast, and the Chesapeake Bay., 2012 (45th) Edition.

Corrections

Chapter 4, Paragraph 40, read:

- (40) **Barnegat Inlet**, 21 miles southward of Manasquan Inlet, forms a passage from the Atlantic Ocean through **Oyster Creek Channel** to the New Jersey Intracoastal Waterway and Barnegat Bay. The approach to the inlet is marked by a lighted whistle buoy about 1.7 miles SE of the N jetty. The inlet is protected by two jetties marked by lights. A sound signal is at the south jetty light. Two orange and white danger buoys are NE of the N jetty to mark the submerged jetty between Light 6 and the exposed jetty. Buoys inside the channel are moved frequently and not charted. **Barnegat Light** (39°45'51"N., 74°06'22"W.), on the south side of the inlet, is the most prominent landmark in the area; it is a 163-foot-high brick tower, dark red on its upper half and white on its lower half. The lighted tower is maintained by the State of New Jersey as a historical monument. Also prominent from seaward is a 391-foot-high powerplant stack at the head of Oyster Creek, on the west side of Barnegat Bay.
