

Publication - National Ocean Service - U.S. Coast Pilot 7, covers the rugged United States coast of California, Oregon and Washington, between Mexico on the south and Canada's British Columbia on the north. Coast Pilot 7 also includes Hawaii and other United States territories in the South Pacific., 2012 (44th) Edition.

Corrections

Chapter 9, Paragraph: 159, read:

The river is entered through a dredged channel between two partially submerged jetties; caution is advised. The river then leads S to a turning basin off the town of Florence, 4.4 miles above the entrance, thence E for about 2 miles to Cushman. A light, seasonal sound signal, and a Coast Guard tower are on the N jetty. The channel is marked by a **096°** lighted entrance range that favors the N side of the channel, and by other ranges and navigational aids to 1 mile above Florence. The uncharted buoys at the mouth of the river are frequently shifted to mark the best water. The bar at the entrance is narrow, and the depths vary greatly because of storms and freshets. The entrance and south jetty shoals tend to build during late winter and spring. Mariners are advised to contact **Siuslaw River Coast Guard Station** on VHF-FM channel 16 before attempting to cross the bar. A **Federal project** provides for an 18- to 16-foot depth in the entrance channel to the highway bridge at Florence; thence 16 feet in the turning basin; thence 12 feet to Cushman. (See Notice to Mariners and latest editions of the chart for controlling depths.)
